In each organization, Compliance is becoming more and more important. Ensuring compliance with applicable laws and requirement in areas like Data Protection, Product Safety, Information Security, Anti Money Laundering and others is applied to avoid legal risks and to protect company's reputation and its brands. Efforts to combat bribery and corruption are necessary in each era. No sector is immune to bribery, which is one of the most complex problems also of our times. Everybody knows that it is not possible to eliminate bribery, but adopting the ISO standards helps to prevent unethical or unlawful behaviour. Moreover, it could mitigate the risks and consequences.

In one morning we will give you an overview of the legal impact and the negative economic consequences of the bribery and we will explain why the standards could be the best way to fight the bribery.
